AMENDMENT

Sir:

In response to the Advisory Action mailed February 5, 2003, and in connection with RCE
filed herewith, please amend the above-identified application as follows:

IN THE SPECIFICATION:

Please replace the paragraph beginning on page 3, line 18, with the following:

C1
Figure 1 illustrates one possible specific embodiment of a temperature sensor 10 according to
the present invention. Such a temperature sensor 10 can, for example, be a functional element of a
laminated layer sensor. In this case, the sensor has a layer 12, in which a conductor track 14 is
embedded that is connected, in turn, via two contact points 16 to an evaluation device 17.
